

CAREER OBJECTIVE

Passionate Web Developer and Agentic AI Explorer with a keen interest in Machine Learning and Deep Learning, dedicated to building intelligent, scalable, and autonomous systems. Proficient in developing interactive applications, optimizing backend performance, and implementing AI-driven end-to-end solutions. Always eager to explore cutting-edge AI technologies and multi-agent frameworks to deliver innovative, future-ready solutions

SKILL SET

- **Technical skills:** JavaScript, PYTHON, HTML, CSS, MYSQL, MongoDB, C.
- **Framework & libraries:** React, Express, Node.js, Tensorflow, OpenCV.
- **Soft Skills:** Teamwork & Collaboration, Time Management, Leadership

INTERNSHIP EXPERIENCES

ALTRUISTY Innovation April-June 2025

Completed a 2-month internship at **Altruisty Innovation Pvt Ltd** in **MERN Full Stack Development**, gaining hands-on experience developing and deploying full-stack web applications using **MongoDB, Express.js, React.js, and Node.js**. Demonstrated strong adaptability, problem-solving skills, and commitment to teamwork and innovation throughout the internship tenure.

PROJECTS

- **Multi-Agent System for Converting farm waste to value-** Currently developing a Multi-Agent System leveraging **Large Language Models (LLMs)** for intelligent prediction and optimization of agricultural residue utilization. Designing agents for **prediction, planning, and optimization** to enable dynamic collaboration and reasoning. Implementing sustainable waste-to-resource strategies integrating AI-driven decision-making and contextual data analysis for modern agriculture.
- **Summify_AI** - Web application for text summarization, built using HTML/CSS/JavaScript on the frontend and Python (Flask) on the backend. It integrates with the **Groq API(Llama 7b model)** to generate concise summaries of long texts. Users can choose custom summary length (e.g., 50, 100, 200 words) and instantly get a clean, distilled version.
- **Deepfake Detection System with Explainable AI** — Built an image classifier using HuggingFace’s SigLIP transformer, Grad-CAM for visual explanations, and Gradio for deployment with audio/text insights via gTTS.

CERTIFICATIONS

- **Deep Learning and Generative AI** - Attended workshop in Deep Learning and Generative AI, gaining expertise in neural network architectures, model training and optimization, and generative modeling techniques for developing innovative AI applications.
- **MongoDB Certified Course** - Completed a certification course in MongoDB, gaining expertise in NoSQL database management, schema design, indexing, and data aggregation for scalable applications.
- **SOLID principles** - Successfully completed the SOLID Principles course at Scaler, gaining expertise in writing scalable, maintainable, and efficient code following industry best practices.

EDUCATIONAL CREDENTIALS

MEENAKSHI SUNDARARAJAN ENGINEERING COLLEGE	2022-2026
• Pursuing B. Tech Information Technology with an 8.22 CGPA	
SRIRAM VIDHYA MANDIR MAT.HR.SEC SCHOOL	2020-2022
HSC Class 12 – 84 %	
SSLC Class 10 –79 %	2019-2020

ROLES HELD

- **President , Asthra symposium (2025)**

President of Asthra Symposium 2025 – Successfully led the planning and execution of the event, ensuring seamless coordination among teams. Managed logistics, speaker engagements, and audience participation to achieve record attendance. Delivered a well-organized symposium that received positive feedback from attendees and stakeholders

PERSONAL DETAILS

Father's Name: A . PADMANABHAN

Residential address: NO:38, Telecom Avenue, Perumalpattu, Thiruvallur- 602024.

Hobbies: Book Reading, Running, Lifting weights, Swimming, and Exploring the internet.
